

MAY 1 - RALLY

Queen's Park needs to get the point.

If Bill 30 dies, 33,000 will be wounded.

That's how many health care workers are injured annually in Ontario by needlestick injuries.

Bill 30 would make mandatory the use of safety engineered devices to prevent such injuries.

All parties have voted to support the Bill through two readings.

The problem is, the government has stalled the Bill in committee, leaving it to die if not passed before

**It's worth
10 minutes to
prevent 33,000
injuries a year.**

the end of this legislative session.

With all party support, this Bill could be passed into law with just 10 minutes of the legislature's time. That's just 10 minutes to prevent 33,000 injuries a year.

We are asking for a small amount of your time to tell the government that 33,000 injuries a year is worth a small amount of their time. We think it's worth the effort. Don't you?

Safe Needles, Save Lives
