

Demand better public health care.

Our public health care is at stake this federal election, with **underfunding, worsening staffing shortages and private influence**. Let's demand better public health care for all by electing a federal government that will fix the understaffing crisis and fully fund and expand our public health care.

Imagine a health-care system where:

- Everyone has access to timely, high-quality public care.
- There are enough nurses and health-care workers to take care of everyone.
- You receive the care you need and deserve, close to home.

Our federal government has the **resources and responsibility** to make it happen, and we can use our votes to make it a reality.

Vote with **NURSES**

Private, for-profit health care hurts access for most people, provides worse care and costs more. Instead of giving our taxpayer dollars to private corporations, we need a federal government that will ensure our public health care is truly universal and fully funded.

Let's use our votes to:

- Fix the understaffing crisis in all health sectors.
- Improve access by fully funding public health care.
- Expand pharmacare to cover all prescriptions.
- Improve the social determinants of health like affordable food and housing, child care and expanded rights for equity-deserving communities.
