

# STAFFING RATIOS *now!*

Access to health care should not be just for the wealthy few. We all deserve equal access to safe, timely, high-quality care when we need it. That's why more than 68,000 **Ontario Nurses' Association** members are fighting to protect and improve our public health-care system.

## **DEMANDS:**

- Legislated minimum staffing ratios across Ontario's health-care system
- An end to private, for-profit health care

## **WITHOUT STAFFING RATIOS WE WILL SEE:**

- Longer wait times
- Potentially life-threatening delays in care
- Service closures
- Deskilling of staff
- Unreasonable workloads
- Moral injury because nurses and health-care professionals cannot provide the care people need and deserve

# HEALTH CARE FOR ALL

## THE FORD CONSERVATIVE GOVERNMENT IS:

- Moving public health services to private, for-profit corporations
- Diverting taxpayer money from staffing to corporate profits
- Allowing private, for-profit corporations to charge OHIP more and pass costs onto us
- Paying private clinics at least 2.5 times more than public hospitals for the same procedures
- Allowing corporations to poach staff from our public system

## STOP PRIVATE, FOR-PROFIT CARE!

## MINIMUM STAFFING RATIOS WILL ENSURE:

- Safer care and fewer complications
- Health and recovery at home with shorter hospital stays
- Timely access to care when patients, residents and clients need it most
- Better retention and recruitment health-care staff
- Savings in our public health-care system

*Take Action!*

Support staffing ratios and an end to private, for-profit health care to ensure health care for all!
